THE CORPORATE IP INSTITUTE

ATLANTA, GA

full year CLE / Ethics / Professionalism*

www.gsuip.org/corporate

NOVEMBER 15-16, 2011
Who You Will Meet

IP strategy requires careful analysis and planning, while IP licensing (and divestiture) is a networking and shoe leather business. The Corporate Intellectual Property Institute provides a forum that fosters casual interaction with accomplished industry leaders involved in all aspects of intellectual asset management.

Decision-makers from best-in-class organizations share their thoughts in panel discussions as well as during informal networking breaks and social events. Join your peers in exploring business development through IP at the 2011 Corporate Intellectual Property Institute.

About the Event

This event takes place at a time of significant change in the IP industry. Intellectual property is now recognized at executive levels as leverageable assets – perhaps as a consequence of this, we see the evolution of business models directed at increasing the liquidity of the IP marketplace.

Join your peers in the heart of Georgia for the 2011 Corporate Intellectual Property Institute. Based in Atlanta, this Institute was formed by IP professionals to share best practices, network, and discuss emerging business issues. Georgia State University’s Robinson College of Business and College of Law were instrumental in laying the foundations of the networking organization; that synergy continues today as Georgia State University hosts the 2011 Corporate IP Institute.

The Institute meets for two full days, as industry leaders participate in panel discussions focusing on pertinent issues facing IP professionals. Experienced practitioners from recognized best-in-class organizations will share learnings on topics that range from taking a first look at your organization’s intangible holdings to reaching out across other industries and leveraging your assets in the global marketplace.

More companies than ever before are turning to the U.S. International Trade Commission to enforce their intellectual property rights at the U.S. border. The ITC’s powers to block unlawful goods not just from one source, but all sources, from entering the U.S. poses a potential threat to anyone dealing in imported goods. Prometheus Labs., Inc.; Kappos v. Hyatt; and Caraco Pharm. Labs., Ltd. v. Novo Nordisk A/S. The Federal Circuit's recent split en banc decision in Therasense, Inc. v. Bectin, Dickinson & Co. regarding the standard for inequitable conduct also appears ripe for Supreme Court review and will be discussed. Finally, the panel will discuss the Supreme Court's recent decision in Global-Tech Appliances, Inc. v. SEB S.A. and its impact on the law of indirect infringement.

**Panelist:** Marcus Delgado, Chief IP Counsel, Cox Communications, Inc.
1:30 – 2:45  
**THE RAPIDLY CHANGING IP LANDSCAPE AND ITS IMPACT ON CORPORATE IP MANAGEMENT**

The once serene landscape of IP practice endured a further relentless dizzying pace of change in 2011 which shows no signs of easing in the near term. Driven by accelerating globalization, rapid technological and social change, and pervasive economic upheaval, an almost frenetic transformation of IP law continues. How are these changes affecting the way companies manage their IP portfolios? Are meaningful budgeting and near term strategic planning goals realistic in this environment? Will traditional models for delivering IP legal services survive? Where will future IP superlawyers come from? Will the current drive to create an IP asset market seriously impact the way IP portfolios are viewed by corporations? An experienced panel of senior IP law leaders will address these and other difficult issues facing the profession today.

**Moderator:**  John K. Williamson, K&L Gates  
**Panelist:**  
- Krish Gupta, Vice President and Deputy General Counsel, EMC

Most of us are familiar with surveys that describe "average" fees and costs for litigating IP claims. But the fees in any given case often vary widely from these statistical averages. The panel will discuss early assessment of the likely actual fees and costs in a case as part of the overall early case assessment, including which factors (e.g. number of defendants, the nature of the adversary, venue, complexity, law firms involved, etc.) affect fees and costs the most. Strategies for predicting and managing fees will also be addressed.

**HOW TO "SHOW" VALUE IN YOUR IP**

More companies and entities than ever before are looking at ways to extract maximum value from their IP assets. These entities have spent years and a tremendous amount of R&D dollars towards innovation and building “valuable” IP portfolios. Oftentimes, their product focus changes, business decisions leave technologies without a home, or they are looking to maximize revenues in tough times. All IP owners are taking inventories of their options going forward, especially as they are getting tremendous pressure to extract additional value based on large IP-related transactions in the national and global press. This panel will explore various ways they approach IP valuation as a concept; how they do it, what they are trying to accomplish, and how it plays into their overall business strategies.

**Moderator:**  
J. Donald Fancher, Deloitte Financial Advisory Services LLP

**IP AND ETHICAL PITFALLS AND PRATFALLS OF CONFIDENTIALITY AND JOINT DEVELOPMENT AGREEMENTS**

Confidentiality and joint development agreements are now commonplace in the world, particularly as companies of all sizes enter into agreements to collaborate on development of both improvements to existing technology and new innovations. These agreements provide companies with the means for protecting highly sensitive information that is disclosed to the other party or that arises during the collaboration. These agreements also can provide companies with the means to preserve and protect valuable intellectual property rights. Despite the importance of these agreements, many companies often rely on boilerplate confidentiality agreements and joint development agreements to conserve resources. Not surprisingly, the boilerplate agreements often fail to adequately protect the company's interests and fail to reflect the often nuanced and complex business relationships. The moderator and panelists will address the pitfalls and pratfalls of relying on boilerplate confidentiality and joint development agreements and the best practices for drafting and negotiating these agreements.

### NEW SOURCES OF IP-BASED INNOVATION: THE ROLE OF OPEN SOURCE AND LINUX IN THE NEW ECONOMY

With the advent of open source, the invention and innovation process is being opened up beyond the borders of the single corporation to invite in highly creative people to contribute their ideas and leverage their intellect. New Economy companies are increasingly collaborating through open source projects to innovate in software and beyond as the expanding community of corporate and individual participants offers a more cost effective and expeditious path to high levels of innovation and value creation than was previously achievable. Unlike technologies that may be impermanent, open source as a modality for invention is a social phenomenon that is permanent and part of a community-based ethic that is organic and irreversible. In this context, the changing role of IP will be explored.

**Speaker:** Keith Bergelt, Chief Executive Officer, Open Invention Network

### ETHICAL ISSUES FACING CORPORATE IP COUNSEL

This interactive lunch discussion will feature a presentation of ethical issues faced by Corporate IP Counsel and will facilitate discussion of these issues from seasoned IP practitioners - both in-house and in private practice. Participants in this discussion can expect to broaden their skills and knowledge needed to appropriately navigate and resolve ethics dilemmas encountered by those practicing IP law.

**Moderator:** Michael Powell, Shareholder, Baker Donelson
**Panelist:** Kevin Cranman, General Counsel, Ericsson Television Inc.
**Panelist:** Jose A. Duthil, Senior Corporate Counsel, Cisco Systems, Inc.

### INTELLECTUAL PROPERTY LICENSING BEST PRACTICES

Licensing intellectual property rights can either be a hindrance or the lifeblood of a company – and sometimes both. A panel will address important considerations as they relate to copyright, trademark, and patent licensing practices. The discussion will focus on business cases for licensing intellectual property rights and common pitfalls that should be avoided when doing so.

**Moderator:** George D. Medlock, Alston & Bird LLP
**Panelist:** Melissa C. Howard, Senior Counsel, Turner Broadcasting System, Inc.
**Panelist:** Susanne Hollinger, Chief Intellectual Property Officer and Associate Director, Emory University Office of Technology Transfer
**Panelist:** Jason Weaver, Marketing Counsel, Nascar, Inc.

### MAKING THE MOST OF FLUID AND NON-TRADITIONAL TRADEMARKS

There are many creative branding devices that redefine what a trademark is. Non-traditional trademarks, such as scent, sound, color and taste, can differentiate a company and reinforce its brands. Fluid trademarks – the new trend of mutating marks – can also engage consumers in new ways of interacting with a brand. This presentation will focus on how creative brand owners can use these exciting forms of trademarks to enhance their brands without compromising their rights.

**Moderator:** Charlie Henn, Partner, Kilpatrick Townsend
**Panelist:** Christine M. Cason, Senior Trademark and Copyright Counsel, Georgia-Pacific LLC

*Provides 6 general and 1 ethics CLE credits.*
