Getting Started with Classroom Polling (Clickers)

If you do not have TurningPoint software installed on your office computer, please contact the Law Technology Help Desk at 3-9111. Let the help desk technician know that you would like it installed and to have a training session. Our Desktop Support team will install the software for you, and you will be contacted so we can find out the best time that we can meet with you for a training session.

At this training session, you will be shown the features of the TurningPoint Toolbar in PowerPoint, the types of polling questions you can use, and how to save your clicker session data and run reports with that data.

Checking out Clickers

Once you have created your presentation with your questions in TurningPoint, you can check out a clicker kit from the Law Library Circulation Desk.

There are three sizes of kits available:

- Small (25 clickers)
- Medium (50 clickers)
- Large (100 clickers)

These kits are available on a first-come, first-serve basis. Please make sure to return the kit in a timely manner. *Clickers for visually-impaired students are available upon request. Please contact the Law Technology Help Desk at 3-9111 at least 24 hours in advance of your class.*

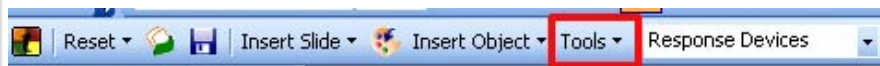

In the Classroom

The clickers have a range of 200 feet. You will need to plug in the USB receiver into the USB port on the front of the computer inside the podium.

Click the TurningPoint icon on the desktop.

On the TurningPoint toolbar, follow the menu path Tools>Settings.

Select [ResponseCard Channels](#) and set the channel to the one specified for your room in the channel chart located inside the clicker kit.

Change the number of expected devices to the number of your students.

Click Done.

Need Technology Help?

Law IT presenting at CALI 2010

June 17, 2010

Three members of College of Law Information Technology team are presenting at the Center for Computer-

It's easy to set the channel on the clickers. After you pass the clickers out to your students:

1. Have the students press the GO or Ch button on their clickers.
2. Ask the students to enter the 2 digit channel code for your classroom.
3. Have the students press the GO or Ch button once more on the clicker.
4. The LED indicator at the top left of the keypad should flash green for a second. If it does not, have the student repeat the process again.

If you encounter any problems using the clickers, please use the classroom phone and contact the Law Technology Help Desk at 3-9111.
